SECTION – A (READING) (20M)

Q1. Read the passage and answer the following questions:

1. The Corbett National Park, which is 290 km north east of Delhi, in the Central Himalayan foothills, was established in 1936. It was originally called Halley National Park but was renamed in 1957 after the renowned naturalist and legendary hunter Jim Corbett of the Maneaters of Kumaon fame.
2. The entry to the park is through three manned points.
3. The varied topography and vegetation gives Corbett Park a rich and diverse natural beauty. Flat valleys are interspersed with hilly ridges. Ravines, plateaus, marshy depressions and grasslands provide natural heavens or one can say heavens.
4. The reserve is widely known for the Bengal tiger and Asiatic elephant. Leopards are found in the hilly terrain and sloth bears in the lower regions. The jackal, wild boar, langur, Rhesus monkey, cheetah, sambhar, spotted deer, hog deer, jungle cat all are abundant. One can spot the gharial and the marsh crocodile along the river. The Indian python, viper, king cobra and krait also reside here. There are about 600 recorded species of birds, such as pelicans, herons, egrets, storks, lapwings, falcons, eagles, buzzards, owls, vultures, parakeets, pheasants, partridges, etc.
5. Smell the sal and the shisham but inhale gently- city lungs are not used to such fresh, clean air. Trail the tiger, lose track of time. Unwind in the unspoiled uplands. Discover wildlife, watch the woods, and wake up to the birds warbling. Get bedazzled by the beauty and the beast. Soak up the stillness, serenade your senses, savour the serenity, shake away your stress. Experience the magical therapeutic effect of wilderness-it is meditation with your eyes wide open. If animals or plants could speak, their message to mankind would be: 'This jungle is better than the concrete one you live in. Will you please let it be?'
