GLOBAL UNIVERISTY FAIR- 2023

Dear Parents

Greetings! In our continued endeavour to provide maximum opportunity and exposure to our students, Dwarka International School continues with its tradition of organizing a Global University Fair in collaboration with Zenit Excelenciafor college & university admissions support both in India and Abroad.

The University Fair for 2023-24 is bigger and better with a number of national and international universities participating in this event. Representatives of prestigious universities of India as well as Europe and USA will be taking part in this fair to talk to the students about the courses offered at their colleges, admission process and the scholarships available. In addition, interested students and parents will have the option of one-to-one interaction with the representatives of the various universities and will have the opportunity to ask questions specific to your interests and application.

University representatives from a number of countries across the globe will be participating in this event. This mega 'University Fair' is a must-attend for all students as it provides detailed information about the countries you want to study in, learn about the admission process of universities, and have job opportunities thereafter.

We strongly encourage all our students & parents to participate in this mega event and bring along their family and friends who might be interested in exploring career opportunities in general.

This Mega Event of Dwarka International School, India is one of the first events which can broaden your horizon in terms of the options available to you when you choose your future college, university or career both in India or Abroad.
